

Math 203, Spring 2026 — Homework 0

Tim Chumley

Due January 30 at 5:00 pm

Instructions. This introductory problem set is partly to get you familiar with the class structure and technological tools. I know it's fast to have homework due right away, so thanks for jumping in! You will submit responses to Problem 6 below on Gradescope.

Problem 1. Please respond to the [start of semester survey](#) on Moodle.

Problem 2. Bookmark the [class web page](#) and read the syllabus there.

Problem 3. Download our class textbook in [pdf](#) form or purchase a [paper copy](#) on Amazon.com.

Problem 4. Read these [guidelines for writing homework solutions](#).

Problem 5. We will use [Gradescope](#) for homework submissions. If you haven't used it before, you should make an account with your MHC email address and read this [short tutorial](#) on submitting assignments. Your account should be linked to our course automatically but you might need the entry code **RVR57V**. Please let me know if you have trouble.

Problem 6. Write up solutions to the problems from the [day 1 worksheet](#) and submit them on Gradescope. We might end up discussing answers to some of these in class, but I want you to write up solutions to all of them. Here are three important technical details: (1) write up solutions on a separate page or pages of paper or a handwriting app on a tablet, (2) make sure to match pages to problems when doing the Gradescope submission, and (3) instead of regular pictures from your phone, submit a pdf made with the Gradescope iOS or Android app, a scanning app on your phone, a scanner on campus, or a handwriting app on a tablet that so that it's easier for me to read.
