

Math 339SP, Spring 2024 — Project assignment 1

Tim Chumley

Due April 19 at 5:00 pm

Instructions. This prompt covers material in preparation for the group presentation.

Problem 1. In preparation for your presentations, I'd like you to read and take notes on the material related to your project topic. The goal as you take notes is to get a baseline understanding of the topic and to organize your thoughts. I'd like you to write down things like basic definitions and examples, as well as questions about what you don't understand yet. You should also be thinking about how and what you might present to classmates. It's ok if you don't understand everything yet. This assignment is to help formalize part of the process of learning something new. Taking notes can be important. I'd like you each to take at least 2 pages of notes, including at least 2-3 questions you have about the material.
