

Math 339SP, Spring 2024 — Midterm Exam Revisions

Mount Holyoke College

Due April 12 at 5:00 pm

Instructions. As part of the midterm exam we will have a process for exam revisions. The revision process will give you an opportunity to learn from mistakes and continue to understand the material more deeply. It will also allow you to earn back some credit. For complete and well-done revisions, you will get back 25% of points missed on the exam. For example, if you originally scored 40/50, your new score will be 42.5/50. I'll ask you to do the following.

- a. For each problem that you lost points on, give a complete corrected solution.
- b. At the end of the revisions, write a short summary of what went wrong in your original solutions and how you addressed the issues. This is open ended and about a paragraph long. It should be reflective and written in complete sentences.

You can work with classmates and get help from me, as well as use the book and class notes. The revisions will be due on Gradescope by April 19 at 5:00 pm.
