

Math 339SP, Spring 2022 — Project assignment 2

Tim Chumley

Due May 3 at 11:59 pm

Instructions. This prompt covers material in conclusion of the group presentation.

Problem 1. As a conclusion to your group project, I'd like you to each individually write a summary report on your topic. Of course your report will capture the ideas in your project reading, but you should write 2.5-4 pages in your own words. You might take your presentation as an outline, but it's not necessary to follow its structure. The report might include a calculation or proof that didn't fit the structure of a short presentation, for example. It might include discussion of questions that came up in your initial preparation notes or in your group discussions. Finally, I'd like you to spend the final paragraph giving a short reflection or self evaluation about the project. What went well? What could be improved?
